

PRESS RELEASE

Todu Guam Foundation Health & Wellness Center Welcomes Clinical Psychologist Dr. Alan Butler to Expand MindCare Behavioral Health Program

Tamuning, Guam — March 6, 2026

The Todu Guam Foundation Health & Wellness Center (TGF) is proud to announce that Dr. Alan Butler, Psy.D, Licensed Clinical Psychologist, has joined the organization's growing MindCare Mental and Behavioral Health Program, expanding access to behavioral health services for the people of Guam.

Dr. Butler joins Dr. Danny McClure, DO, Board-Certified Psychiatrist, as part of TGF's integrated collaborative care model, where behavioral health specialists work closely with primary care providers to deliver coordinated, whole-person care addressing both mental and physical health.

"Dr. Butler brings strong clinical expertise and a deep commitment to serving the people of Guam," said Lena Calvo-Rodriguez, CEO of the Todu Guam Foundation. *"His addition strengthens our MindCare program and advances our mission of breaking down barriers to mental healthcare access for everyone in our community."*

Dr. Butler earned his Doctorate in Clinical Psychology (Psy.D) from Antioch University Seattle, an APA-accredited program, and has extensive experience providing psychological therapy, evaluations, and diagnostic assessments for children, adolescents, and adults in both community mental health and private practice settings.

Dr. Butler's areas of expertise include psychological evaluations, individual therapy for children, adolescents, and adults, couples and family therapy, and diagnostic assessments for conditions such as ADHD, Autism Spectrum Disorder, learning disabilities, and other behavioral health concerns.

At TGF, Dr. Butler will support the MindCare Behavioral Health Program, which provides integrated mental health services including psychiatric care, psychotherapy, psychological assessments, and collaborative treatment planning alongside primary care providers.

"Our integrated model allows patients to receive coordinated care that addresses both their mental and physical health," said Dr. Danny McClure, DO. *"Dr. Butler's experience and*

collaborative approach will be a tremendous asset to our patients and to the continued growth of the MindCare program.”

The Todu Guam Foundation Health & Wellness Center continues to lead efforts to expand healthcare access across Guam by serving insured, uninsured, and underinsured residents. The center offers a Sliding Fee Discount Program for qualifying patients, along with other financial assistance programs supported through partnerships and charitable resources, helping ensure that cost does not become a barrier to receiving care. TGF accepts most major insurance plans and provides pathways to care for individuals who may not otherwise have access to healthcare services.

Individuals seeking behavioral health services may now schedule appointments with Dr. Butler through the MindCare program at the Todu Guam Foundation Health & Wellness Center.

About Todu Guam Foundation Health & Wellness Center

The Todu Guam Foundation Health & Wellness Center is a nonprofit healthcare clinic operated by Todu Guam Foundation, Ltd., a Guam-based 501(c)(3) nonprofit organization whose mission is to improve the health and well-being of the community by expanding access to healthcare, social services, and other essential support programs.

The foundation works to break down barriers that prevent individuals and families from receiving the care and assistance they need, serving insured, uninsured, and underinsured residents across Guam.
